Samuel Stuhl

sam.stuhl.personal@gmail.com | github.com/Sam-Stuhl | linkedin.com/in/samuel-stuhl

Summary

Full-stack software engineer with two software engineering internships and a track record of independently building and operating production systems end to end, spanning backend, frontend, and infrastructure. Comfortable across Python, TypeScript, FastAPI, React, PostgreSQL, and Docker, with experience exposing APIs and MCP interfaces for AI-agent access. Founded and led a 5-member CS Club executive team, writing the Python curriculum and running hands-on workshops.

Experience

Software Engineering Intern Jun 2026 – Aug 2026
LumaSoft *Hybrid - East Brunswick, NJ*

- Designed an Intercom-integrated issue writer auto-drafting bug reports from support conversations, adopted for 97.5% of customer tickets.
- Built lumadot, an autonomous AI code-review agent integrated with GitHub Actions across ˜11 org repos; the org's most-used agent, reviewing 87% of merged PRs.
- Built an issue analyst linking the agent read-only to six external systems (Rollbar, Datadog, GCP, Intercom, MySQL, Cloudflare) for cross-system triage; 79% approval rate on generated analyses.
- Built luma-logger, a ˜1,667-line Cloudflare Worker (TypeScript, Hono, Drizzle ORM, Cloudflare D1) exposing a read-only observability dashboard with run logs and per-run cost metrics.

Software Engineering Intern Aug 2025 – Dec 2025
I-Genie.ai *Remote*

- Engineered Python data pipelines with automated QC and improved ML/NLP workflows by migrating TF-IDF to FastText and designing LLM prompts for relabeling and corpus curation; boosted accuracy while cutting runtime.
- Built analytics tooling and infrastructure: Streamlit UIs, Spark over Azure Blob, and Databricks/Colab GPUs; generated JSON-driven charts and presentation-ready insights.

Projects

Planner - Multi-Tenant Calendar PWA | *Python, FastAPI, PostgreSQL, React, TypeScript, MCP*

- Built and operate a multi-tenant planner PWA unifying classes, work, and Canvas assignments on one calendar; 675 commits, ˜45k lines of app code, ˜1,364 tests.
- Designed a three-layer domain model with recurrence materialized once per rule, and exposed a public REST API plus an OAuth-secured MCP server for agent access.

Console - Self-Hosted PaaS Control Plane | *Python, FastAPI, React, TypeScript, Docker, Traefik, MCP*

- Built and operate a self-hosted PaaS control plane running 6 production apps: zero-downtime deploys behind Traefik with health-checked swaps and rollback; 103 commits, 465 tests.
- Implemented secretless CI-to-server auth via GitHub OIDC and exposed a dual REST/MCP interface (24 tools) for an AI agent to operate deploys and logs.

CareerBase - Git-Style Resume Manager | *Python, FastAPI, React, TypeScript, Claude Messages API*

- Built and deployed CareerBase, a git-style resume manager with full version history, diffing, and one-click PDF compilation, open to public sign-up; 240 commits, ˜31k lines, ˜274 tests.
- Shipped an in-app AI agent on the Claude Messages API with a streaming tool loop and four least-privilege skills.

Leadership & Extracurriculars

President, CS Club
Middlesex College

- Led 5-member executive team at 16, organized planning meetings, and created Python curriculum.

Software Captain, Robotics Team
Timothy Christian School

- Directed programming subteam and coordinated development tasks.

Education

New Jersey Institute of Technology, Ying Wu College of Computing Sept 2026 – May 2029
Newark, NJ, USA

Timothy Christian School Sept 2021 – Jun 2026
GPA: 4.489 *Piscataway, NJ, USA*

- **Relevant Coursework:** Salutatorian; AP CSA, AP CSP, AP Calculus BC, AP Calculus AB, Honors Physics; STEM Scholars Program: shadowed at Merck (data analytics, Power BI, dimensional modeling) and Evergreen Financial Group (portfolio construction, trading, investment vehicles)

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, Swift, Bash
Frameworks & Libraries: FastAPI, React, scikit-learn, Pandas, NumPy, PySpark, Streamlit, Hono, Drizzle ORM
Cloud & Data: PostgreSQL, Docker, Cloudflare Workers, Cloudflare D1, Databricks, Spark, Azure Blob, Google Colab, Power BI, MySQL
Developer Tools: Claude Code, Git, GitHub, GitHub Actions, VS Code, Xcode, Cursor AI, Android Studio
